## TERMS OF SALE

1. This is a **MAIL AUCTION SALE**.
2. Lots will be sold on the date indicated. Send **LATE BIDS** by air mail.
3. Acceptable credit references, or a 25 per cent deposit, are necessary to assure entry of your bids.
4. There is no additional charge or commission for bids mailed in to **HENRY CHRISTENSEN INC.** We will purchase lots for mail bidders below the maximums given, where competition permits.
5. The highest bidder shall be the buyer, at the normal advance over the second high bid, provided, however, that the acceptance of any bid shall be solely at the absolute discretion of the auctioneer, to whom is reserved the right to accept or reject any and all bids. If duplicate lots are available, both may be sold at the same price, which will be the normal advance over the third high bid.
6. Unlimited or **BUY** bids will not be accepted. All bids are per lot. Lots will be sold in the numerical order listed in the catalog.
7. Successful bidders must specify any changes they require to replace our normal **REGISTERED AIRMAIL** delivery. **Insurance, postage and shipping charges incurred will be added to invoices**, together with any applicable Sales Taxes. Those who want delivery delayed or coins held for future pickup should note this on their bid sheets. However, invoices will be sent and must be paid immediately so that consignors may be properly reimbursed.
8. **AUCTION SALES ARE STRICTLY FOR CASH FUNDS.** Payment must be made immediately upon receipt of material or upon notification. **We reserve the right to demand payment before delivery, or to forward lots C.O.D. Accounts unpaid after thirty days will have a service credit charge of 1-1/2 per cent added to the balance each month.**
9. Auction Lots will be available for inspection by appointment, at our Madison Offices - Two Central Avenue - during normal banking hours - during the weeks preceding the sale.
10. Unless otherwise indicated, all material catalogued and sold in this sale is guaranteed as genuine and as represented. Any estimates are based on current catalog values or market conditions, but each lot may be sold for a greater or lesser amount.
11. We acknowledge the possibility of errors or typographical mistakes, and any errors on our part will be corrected. Please be careful in placing your bids and **keep a copy of them**. We cannot be responsible for your errors. **There will be absolutely no returns without written permission from the Cataloguer.**

## FELLOW NUMISMATISTS:-

Welcome to our 66th Numismatic Commentary and Mail Auction Sale. This catalog features the third section of the Governor Charles Edison Collection of coins of the world. The sale commences with a broad selection of the coins and tokens of the West Indies, including a large number of cut and countermarked pieces. These are followed by other selections of countermarked coins of the world, both government issues and merchants counterstamps. As with any collection of countermarks, upon cataloguing these coins we discovered a small number of bogus pieces. Even these hanky-panky items, recognized for what they are, can provide informative and sometimes humorous adjuncts to a collection of these coins.

This sale also includes an important specialized collection of the silver cob coinage of Philip II and Philip III of Spain. Both New World mints and the Iberian Peninsular mints are represented. Quite a number of little known or previously unpublished varieties are offered. Among these the Mexican 8 Reales 1609/8 - F/A and the Valladolid 8 Reales of 1600 are significant. A fascinating feature of this collection is the large number of pieces from the end of the reign of Philip II and the beginning of the reign of Philip III using distinctive legends. Instead of the standard PHILIPPUS DEI GRATIA HISPANIARUM / ET INDIARUM REX, these rare pieces substitute new titles and legends reading PHILIPPUS D.G. OMNIUM / HISPAN REGNORUM REX. Instead of king of Spain and the Indies, the king is proclaimed as King of all the Hispanic Realms which can be taken to include Spanish Italy, the Low Countries and Portugal, along with the East and West Indies. This collection includes Eight, Four and Two Reales pieces with legends from the Granada, Seville, Toledo, and Valladolid mints - an important group. Also noteworthy in this collection is a Toledo 8 Reales of Philip II with yet another rare legend variety. This coin has the obverse legend PHILIPPVS DEI GRATIA and the reverse legend PHILIPPVS DEI GRATIA. The king's name appears on both sides of the coin! We have not seen this possibly unique silver dollar referred to in any of the literature.

We are pleased with the results of our 1977 auction sales and look forward to a good year in 1978. Our Edison sale at the New York International Numismatic Convention in December was most successful with many, many pieces going well over what we had thought to be realistic estimates. Along with the sale prices, the comments which many of our colleagues made regarding the conservative grading were also most gratifying.

During this year we hope to continue to present a wide range of coins, medals, and banknotes of the world. Our next sale will include a rather nice collection of Ancient Greek and Roman coins from the Edison holdings together with other consignments.

We are interested in receiving further consignments for our future sales. If you have nice numismatic material which you wish to dispose of, whether collections, selections, or choice individual pieces, we can probably help you find a new home for your material at an advantageous price.

The Commentary section of this catalog includes a Numismatic Jewel describing an unpublished Mexican four reales piece. We also continue our updating of the Kardakoff Russian paper money catalog, this installment covering the bank issues of 1840-1841. A second section of our notes on the numismatic history of Sarawak is also presented.

*During the reign of Philip II, the vast majority of the undated 8 Reales pieces of the Seville mint were issued with the familiar assayer's mark of a p on its side. There were, in addition to P, three other Seville assayers during the latter part of this reign. They are C, F, and U.*

*It is very unusual for a collection to contain a piece from one of these extremely rare provisional assayers. In the following three lots, we offer all three of them.*

- 1121 **SEVILLE. 8 Reales. ND (1580-1590) C.** 27.25 grams. CC 2564 at (1600.00). Vic 704 at (2150.00). *Rare.* Very Fine cob. **PHOTO**

## AN UNPUBLISHED MEXICAN FOUR REALES OF PHILIP III

The photos above show an apparently unrecorded Cuatro Reales of the Mexico City mint struck in the name of Philip III. Assayer F appears on innumerable coins issued in Mexico City during the reigns of Philip II and Philip III, roughly from 1590 to 1616. In the middle sixteen-teens he was replaced by assayer D who continued into the reign of Philip IV. The half dollar shown here is a transitional piece showing both assayer's initials, not as an over initial as had happened with F/A, but as two separate letters. To the left of the shield appears Mo over F. To the right of the shield we see 4 over D. This would seem to indicate that this coin was struck circa 1616 when assayer D was gradually assuming F's duties. No references which we have seen refer to this joint coinage.

The coin weighs 13.36 grams, and the specific gravity is 10.28.

#### State Bank Issues 1840-1841

As mentioned in the previous installment, in 1840 the Russian government attempted to replace the depreciated Imperial State Assignats with banknotes issued by a government bank. This was named the State Commercial Bank. At the same time government banks were founded in Finland and in Poland. While these latter agencies met with some success, the Russian State Commercial Bank was a failure, and its note issues proved unacceptable to the people. In 1841 the government tried again and issued notes on the State Savings and Loan Bank. This issue was also a failure.

Notes of these banks are among the rarest of all Russian paper money, and examples virtually never appear for sale. Hence, pricing these items would be purely speculative and serve little purpose, especially considering what has happened to the prices of choice Russian banknotes since these articles began a year ago. All prices listed in the earlier installments of this series are now obsolete and prices should be doubled or trebled at the very least.

Banknotes illustrated in this installment are taken from Merkki Borg's fine Finnish catalog Soumessa Kaytetyt Rahat and are reprinted with permission of the publisher.

Numbers in the left hand column remain those of the Kardakoff page numbers followed by the lot numbers.

# SOME NOTES ON THE COINS OF SARAWAK ↘

William Wallace Brooke Christensen

## Part Two

### The Large Bust Cents of Charles Johnson Brooke, 1870-1891

After succeeding his uncle as Rajah of Sarawak, Charles Johnson Brooke resolved to continue an independent copper coinage for Sarawak but with his own bust substituted for that of James Brooke. The first of the new coinage appeared in 1870 with subsequent issues ordered sporadically to meet demand. Once again, the dies were engraved by Joseph Moore of Birmingham, and the coinage was struck by Ralph Heaton and Sons, The Mint, Birmingham. The size and metallic composition remained the same as the issue of the previous reign. The cents were of copper, 29.00 mm in diameter, had a plain edge, and weighed 9.35 grams.

Starting in 1884 mintage figures are available for the Sarawak coinage. Among the earlier dates without known mintage data one may say that the 1870 is very common except in superb condition, while the 1879 is the scarcest date of all Sarawak large cents, probably followed by the 1885.

It is the author's belief that a few true proofs were struck of all Sarawak coins for official purposes, though not all dates have as yet been discovered. In the following listings, except for those dates listed by Pridmore as occurring in Proof or those which are in the author's collection, other proof coins are listed as "Not Yet Traced".

During the period in question, Sarawak copper proofs were produced with three different finishes. Most are brilliant proofs, though 19th century Birmingham proof standards were not nearly as high as those of the modern Philadelphia Mint, Royal Mint, or even Franklin Mint proofs. They can still be distinguished from choice currency strikes, even when they are deeply toned as is often the case, by the more brilliant fields with a sheen or luster to them caused by the specially polished dies, by the sharply struck near cameo perfection of the bust, and by the even, square shoulders of the coin's rim. In addition, Sarawak copper proofs generally show a polished plain edge not just the shiny obverse and reverse fields of a first strike currency coin.

The second Sarawak proof finish of this period is the Satin Finish Proof known on some 1889H cents. This finish produced a rather charming result but was perhaps considered too subtle so the brilliant fields were reintroduced.

The third proofing finish appears on only one issue to the best of the author's knowledge. These are the specially gold plated pieces of 1870 prepared for the Brooke family. This finish may have been applied after the pieces left the mint, though it is a very professional job. As the only examples known to the author come from Brooke family holdings, we are inclined to believe that they are official presentation pieces.

The following listings will include quite a number of die varieties, particularly with regard to the size and spacing of the numerals of the date. Presumably the master dies were made without date, and the date numerals, at least the final digit, were placed on the individual working dies by hand. These varieties are included only for the currency strikes; only one proof listing is given for each date.
